CONSTRUCTION PROGRAM

KING'S AND SECONDARY HIGHWAYS

FISCAL YEAR 1974-75

CONSTRUCTION PROGRAM

KING'S AND SECONDARY

FISCAL YEAR 1976

FOREWORD

This publication contains the proposed Highway Construction Program for the fiscal year 1974-75. It consists of projects presently under construction and new projects to begin this year. The program includes work undertaken jointly with other agencies, through Connecting Link Agreements or other cost sharing arrangements.

Involvement in other fields of transportation will continue this year, including the construction of New Ferry System Facilities in the Tobermory-South Baymouth and Kingston areas, and new airstrips in remote locations of Northern Ontario.

Rehabilitation of Northern Ontario roads include Highway 71, north of Sioux Narrows, Highway 540, on Manitoulin Island, Highway 101, west of Timmins, Highway 69 north of Highway 103, and the widening to four lanes of Highway 11 north of Bracebridge. Projects on Secondary Highway 599, north and south of Medcalf Lake, and on Manitou Road, south of Dryden, will proceed throughout 1974.

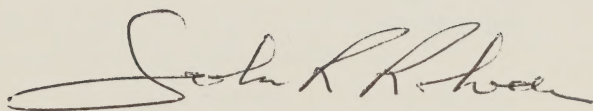

Construction of assured passing lanes will begin this year, to determine their effect on traffic flow. Locations have been selected on Highway 17, between Sudbury and Sault Ste. Marie, and in the Rockland area, east of Ottawa.

In Southern Ontario, work will continue on the various free-way systems. These include Highway 401 and Highway 409 in the Metropolitan Toronto area, Highway 417, east and west of Ottawa, Highway 402, east of Sarnia, and the Queen Elizabeth Way between Hamilton and Fort Erie.

Urban projects, involving cost sharing arrangements with the concerned municipalities, will continue on the E.C. Row Expressway at Windsor, the Hanlon Expressway at Guelph and the St. Thomas Expressway.

Many other construction projects, not mentioned in this foreword are described in the main body of the publication. The intent of the 1974-75 Program is maximum fulfillment of provincial transportation needs relative to budgetary constraints.

		<u>10 miles</u>
TOTAL		637 miles
Bridges		
Overpasses and Underpasses		50
Overheads and Subways		<u>19</u>
TOTAL		69

AIRSTRIP DEVELOPMENT - NORTHERN ONTARIO

This item covers primarily the development of airstrips in remote areas of Northern Ontario.

IMPROVED FERRY SERVICE

This refers to projects undertaken to improve the Ferry Service between Tobermory and South Baymouth and between Kingston and Wolfe Island. The projects include dredging of the harbour areas, new or improved terminal and dock facilities and the design and construction of two new ferries.

PRELIMINARY PROJECT WORK

This category refers to such items as utility relocation and advance ordering of construction materials as well as other work that must be undertaken in advance of the contractor's operation.

CONSTRUCTION AGREEMENTS

This consists of work carried out on designated highway connecting links through municipalities. The Ministry's contribution is: 75% of the cost of the eligible items in cities and separated towns; 90% of the cost of the eligible items in towns, villages and townships over 2500 population; and 100% of the cost of the eligible items in towns, villages and townships under 2500 population.

CONSTRUCTION AGREEMENTS (SPECIAL)

This refers to projects undertaken in urban municipalities on King's Highway Routes, which are not covered by Connecting Link Agreement. In these cases the municipality agrees to accept jurisdiction of the route on condition that certain work is completed.

MISCELLANEOUS CONSTRUCTION

This part of the financial summary includes many projects in which the Ministry is involved either as an owner or as an interested party. In many cases, the work is carried out by a municipality or other agency and a portion of the cost is paid by the Ministry. Also included under this part are such items as: construction overhead; service contracts, such as seeding; and railway level-crossing protection. Some of these items are further explained below.

Construction Overhead

This consists of salaries of certain regional and district personnel (engineering supervisors and staff) whose services cannot be readily allocated to a particular contract or work project.

Railway Level-Crossing Protection

This consists of the installation of automatic signal protection, or the modernization of existing signal protection, at Highway-Railway level crossings.

URBAN EXPRESSWAYS

This refers to projects undertaken to construct freeway-type facilities through urban municipalities to provide efficient movement of local internal traffic and of through highway traffic. Costs of construction and maintenance are shared by the Province of Ontario and the Municipality.

REPAVING PRESENT ROADS

This work consists of resurfacing existing highways which do not require major reconstruction.

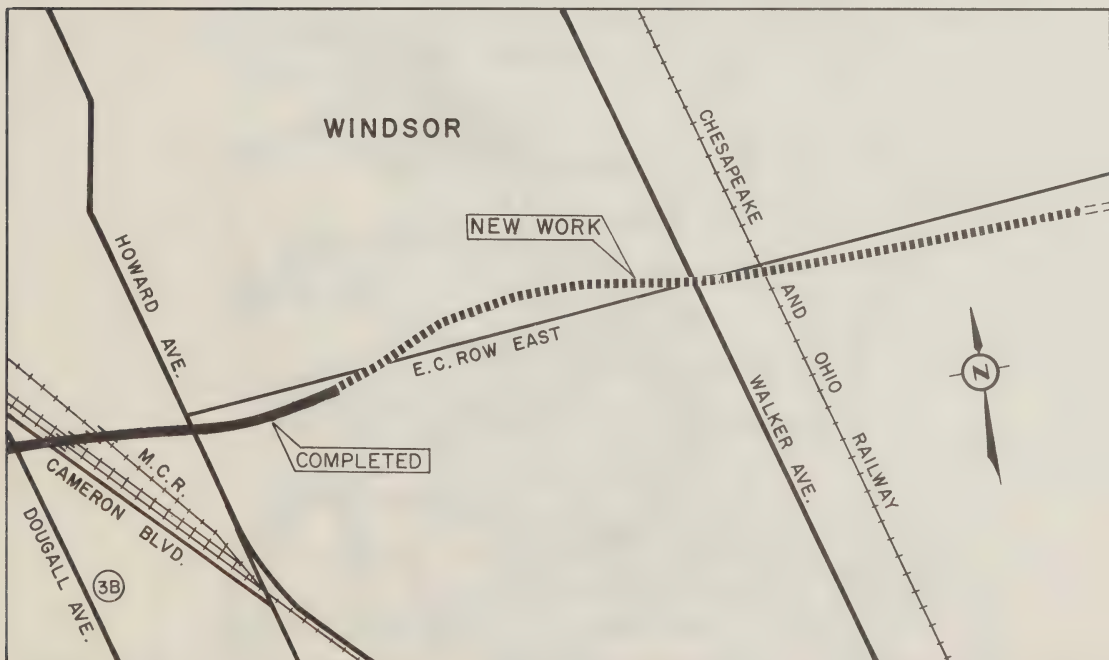

During the 1974-75 fiscal year it is proposed to award contracts for approximately 125 miles of repaving. The total estimated expenditure for this type of work is \$7.3 million.

E. C. ROW EXPRESSWAY

Two contracts have been completed on the E. C. Row Expressway for a total length of 1.2 miles. This work for grading, drainage, granular base, paving and structures, from 0.4 miles east of Howard Avenue westerly, has a total value of 9.2 million dollars.

This fiscal year it is proposed to award a contract for grading, drainage, granular base, paving and structures from 0.4 miles east of Howard Avenue easterly 2.0 miles. The value of this work is estimated at 9.9 million dollars.

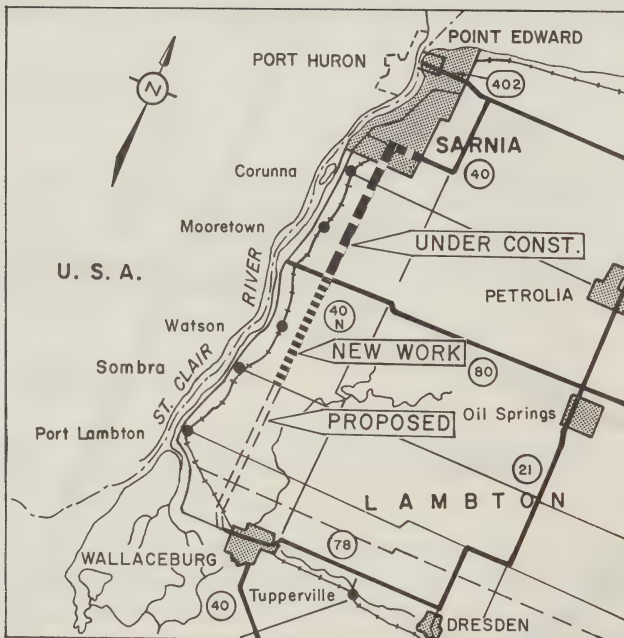

The expressway is being constructed under a cost-sharing agreement between the Ministry of Transportation and Communications and the City of Windsor.

NEW HIGHWAY 40

During the 1973 fiscal year, a contract was awarded for granular base and paving from the Sarnia Bypass southerly to Highway 80, a distance of 8.3 miles. Included in the contract was the widening of 2.7 miles of Churchill Road to four lanes. The value of the work is estimated at 3.9 million dollars.

This fiscal year it is proposed to award a grading and drainage contract from Highway 80 southerly to County Road 2, including a structure over Clay Creek. The value of this new work is estimated at 655,000 dollars.

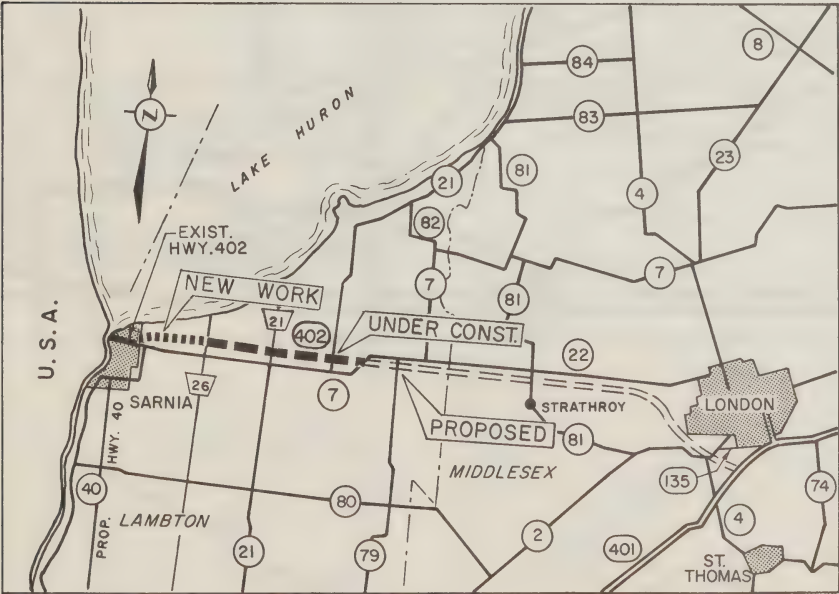

HIGHWAY 402

The first contract for this new facility, was awarded in the winter of 1972. It consisted of grading and drainage of 7.4 miles of highway, from 0.6 miles east of County Road 21 easterly to Highway 7. This work is expected to be completed in the fall of 1974.

During the 1973 fiscal year, a second contract was awarded for grading and drainage from 0.6 miles west of County Road 26 easterly to 0.6 miles east of County Road 21, a distance of 7.0 miles. Included in the contract were five structures and the grading and drainage for 0.5 miles of County Road 21. The contract is expected to be completed in the spring of 1975 at an estimated cost of 4.0 million dollars.

This fiscal year it is proposed to award a contract for grading and drainage from 1.2 miles west of Modeland Road easterly to 0.6 miles west of County Road 26, a distance of 6.6 miles. The contract will include grading and drainage for 1.6 miles of service roads from Blackwell Sideroad to Telfer Sideroad, intersection improvement at Highway 7 and relocated Airport Road, and fourteen structures.

The value of this new work is estimated at 10.5 million dollars.

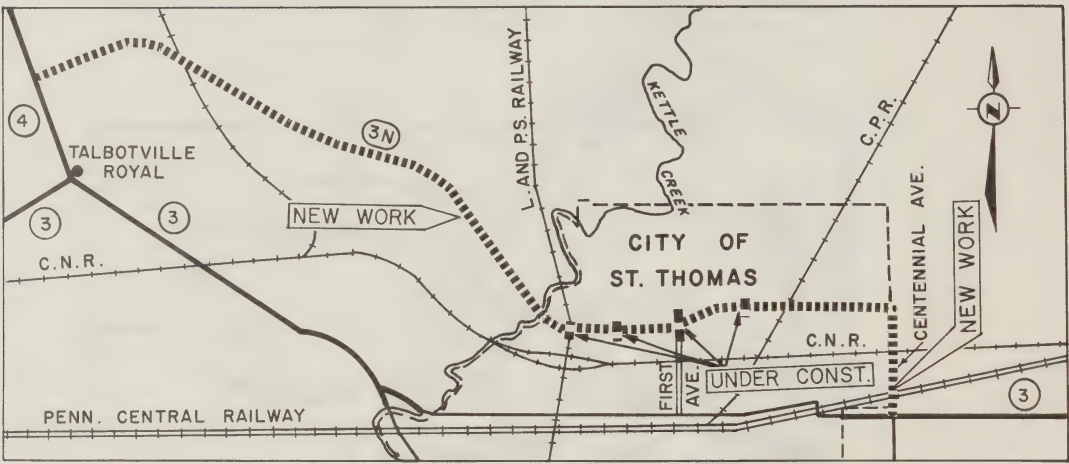

ST. THOMAS EXPRESSWAY

During the 1973 fiscal year a contract was awarded for structures , grading, granular base and paving at First Avenue, Burwell Road and Balaclava Street in the City of St. Thomas. The value of the work is estimated at 1.8 million dollars and it is expected to be completed in the fall of 1974.

This fiscal year it is proposed to award a contract for grading and drainage from St. Thomas east limits westerly to Highway 4, a distance of 6.4 miles. This contract will include a temporary connection to Highway 3 at Centennial Avenue and seven structures. The value of the new work is estimated at 6.0 million dollars.

The in-city alignment of the expressway will be constructed under a cost-sharing agreement between the Ministry of Transportation and Communications and the City of St. Thomas.

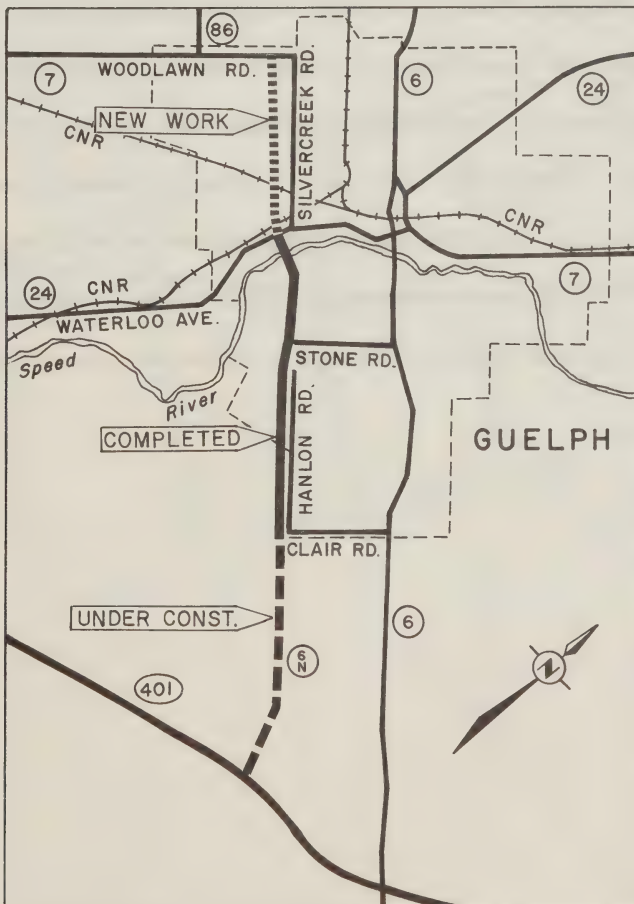

HANLON EXPRESSWAY

During the 1973 fiscal year, a contract was awarded for grading, drainage, granular base and paving on Highway 6 New, a connection from the Hanlon Expressway to Highway 401. This contract included a structure at Highway 401 and a special design culvert extension at Aberfoyle Creek. The value of the work is estimated at 2.4 million dollars. The contract is expected to be completed in the summer of 1975.

This fiscal year the final 2.3 miles of the Hanlon Expressway is proposed for award. This work, extending from Waterloo Avenue northerly to Woodlawn Road, consists of grading, drainage, granular base and paving, and includes construction of the Imperial Road Underpass. The estimated cost is 2.5 million dollars.

The expressway is being constructed under a cost-sharing agreement between the Ministry of Transportation and Communications and the City of Guelph.

QUEEN ELIZABETH WAY - HAMILTON TO FORT ERIE

The rehabilitation of the Queen Elizabeth Way between Hamilton and Fort Erie continued through the 1973 fiscal year, with the award of contracts having an estimated value of four million dollars.

Between Hamilton and Niagara Falls, work continued on contracts for the construction of nine bridges and 3.9 miles of service roads in the Grimsby area. During the current fiscal year, it is expected that a contract will be awarded for the replacement of the Stoney Creek Traffic Circle with a modern interchange. The estimated cost of this work, with related local road and railway projects, is six million dollars.

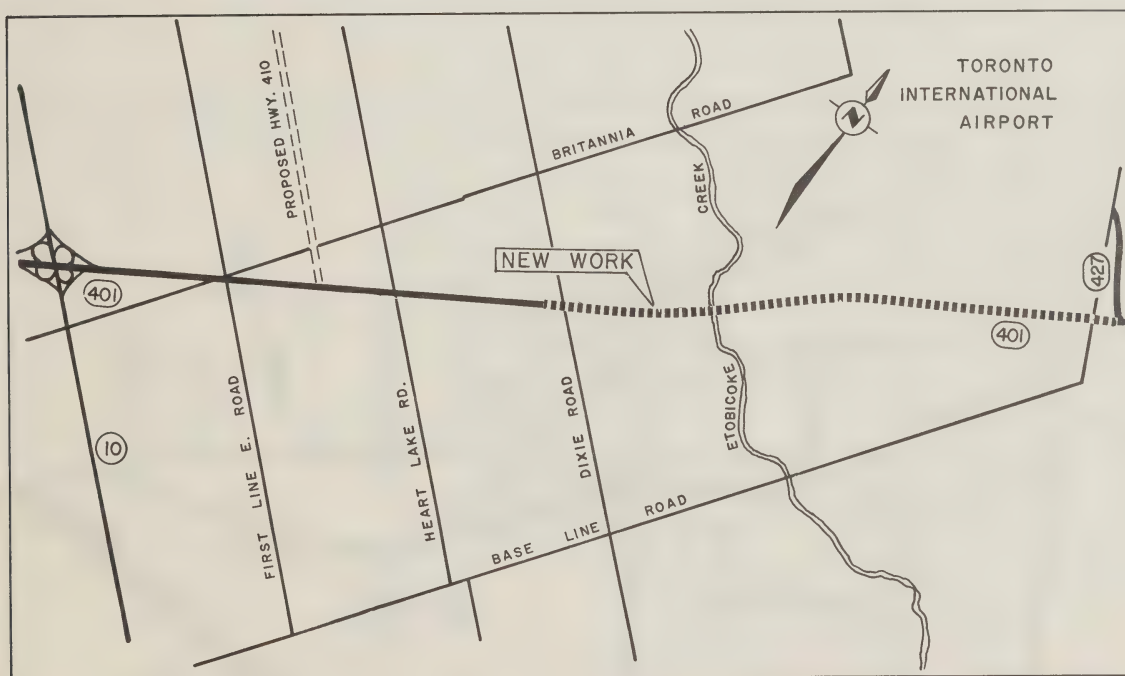

On the Niagara Falls to Fort Erie section of the highway, contracts were awarded for construction of interchanges and service roads at Lyons Creek Road, 4.3 miles south of Highway 20, and at Gilmore Road in Fort Erie. During the 1974 fiscal year, the Ministry proposes to award a contract for preliminary grading and placing of approach embankments for proposed underpasses at Beck Road, and Baker Road.

The estimated cost of this new work is four hundred thousand dollars.

HIGHWAY 401 - FROM HIGHWAY 427 WESTERLY

The Program to widen Highway 401 west of Metropolitan Toronto started in 1973, with the award of two contracts, which included preliminary grading for the proposed Highway 410 interchange, and storm sewer systems from Heart Lake Road to Little Etobicoke Creek and from Dixie Road to Etobicoke Creek. The estimated cost of this work is 2.6 million dollars.

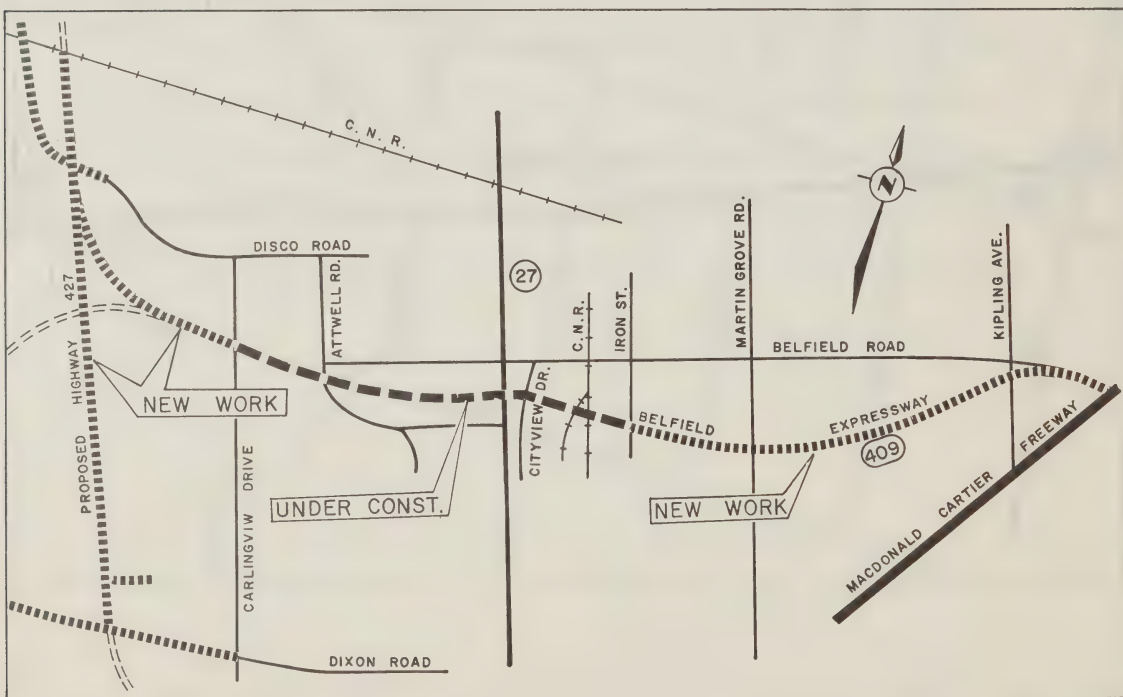

During the current fiscal year, it is proposed to award a contract for widening Highway 401 to a minimum of eight lanes from the Highway 427 Interchange westerly through the Dixie Road Interchange, a distance of 2.5 miles. The value of this new work, which will include a new bridge over the Etobicoke Creek, and replacement of the Dixie Road underpass, is estimated at 8.4 million dollars.

HIGHWAY 409 (BELFIELD EXPRESSWAY)

Construction of this new six lane facility, which is designed to provide urban expressway service from Highway 401 to the Toronto International Airport and the proposed northern extension of Highway 427, began during the 1972-73 fiscal year with the award of a contract, by C.N.R., for the construction of two subway structures and six retaining walls on the C.N.R. spur lines east of Highway 27. In 1973, a contract was awarded by this Ministry for 1.1 miles of grading, drainage and structures from Iron Street westerly to Carlingview Drive. This contract also included reconstruction of several local roads, and construction of detours. The total estimated value of work awarded to date is approximately 8.4 million dollars.

During the 1974-75 fiscal year, the Ministry proposes to award a contract for grading and drainage from Highway 401 to Iron Street, and granular base and paving from Highway 401 westerly to Carlingview Drive, a distance of 2.3 miles. This contract, which will include three structures, is expected to cost in excess of seven million dollars.

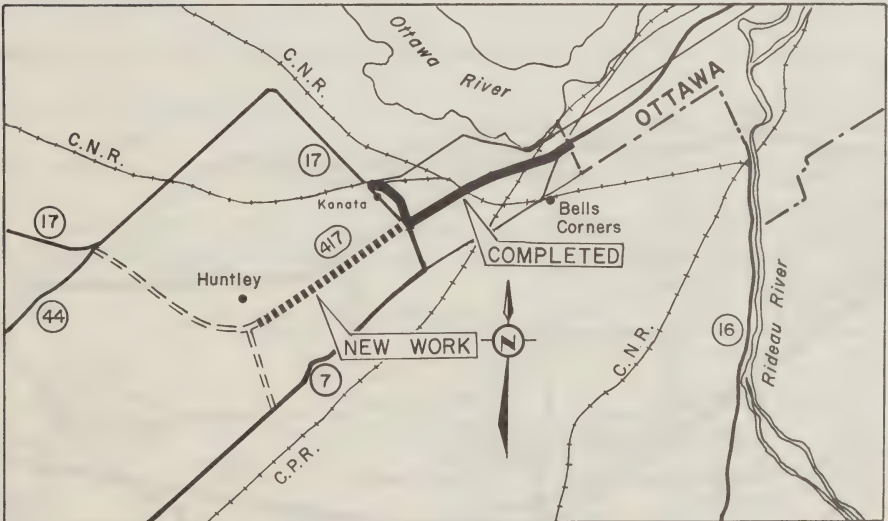

HIGHWAY 417 - WEST OF OTTAWA

The construction of this new facility began in 1967. The section from Ottawa Queensway westerly to relocated Highway 17 south of Kanata has been completed.

During the 1972 fiscal year a contract was awarded for grading, drainage, granular base and paving for the relocation of Highway 17 from Highway 417 northerly 1.8 miles to 0.2 miles south of the C.N.R. crossing. Also included is placement of approach fills for the interchange ramps of Highway 417 and Highway 17, south of Kanata. The value of the work is estimated at 1.8 million dollars. The contract was completed this spring.

This fiscal year it is proposed to continue construction with the award of a grading and drainage contract for the section from former County Road 9 westerly 4.5 miles including two structures over the Carp River, one at Regional Road 5, and an interchange at Goulbourn Road. The value of this new work is estimated at 3.6 million dollars.

HIGHWAY 417 - EAST OF OTTAWA

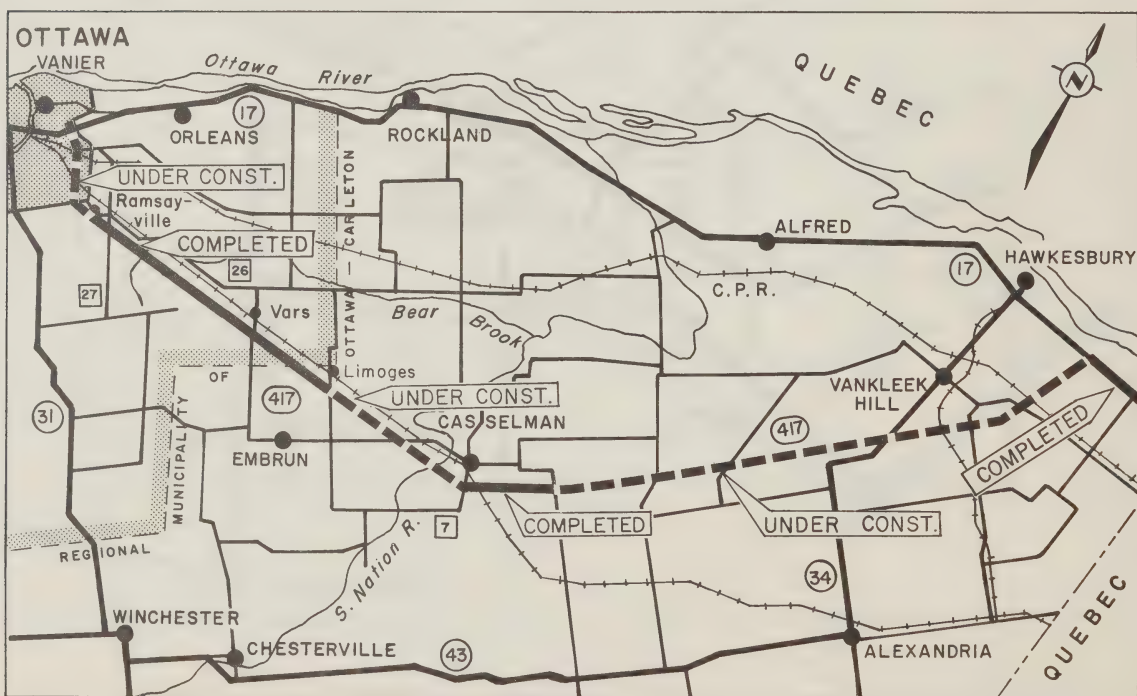

Construction of this new facility is progressing on schedule and 18.2 miles have been completed and open to traffic from Ramsayville to Limoges. Four lanes have also been completed from the Quebec Boundary westerly 6.0 miles. Another 6.0 miles, from Casselman to Glengarry County Road 3A is completed but will not be open to traffic until mid-summer of this year.

All other sections between Ramsayville and the Quebec Boundary have been graded with the exception of one 6.5 mile contract where the grading is nearing completion.

Paving contracts have been awarded covering 37 miles for all incomplete sections between Ramsayville and the Quebec Boundary. Completion of all this paving is anticipated for the fall of 1974. As sections are completed they will be opened for traffic.

The final link from Ramsayville into Ottawa and the Ottawa Queensway is divided into three contracts which were awarded this spring. The target date for completion of this 5.5 mile link is the fall of 1975.

The total cost to construct Highway 417 from Ottawa to the Quebec Boundary is estimated at \$74,000,000.

MAINTENANCE CAPITAL PROJECTS

The total value of the 1974-75 Program is \$6,600,000.

Type of Work	Proposed Expenditure
Miscellaneous Contract Work	120,000
Weigh Scales	20,000
Illumination, Traffic Signals	385,000
Fencing	60,000
Sidewalks	40,000
Bridges	400,000
Bailey Bridges	250,000
Signs	170,000
Crushed Gravel Contracts	780,000
Removing Roadside Hazards	1,000,000
Other Day Labour Projects (Including Carry-Over) Grading, Drainage, Granular Base, Mulch Paving, and Tree Planting	3,375,000
	<hr/>
TOTAL	6,600,000

The major projects are shown in the District Listings.

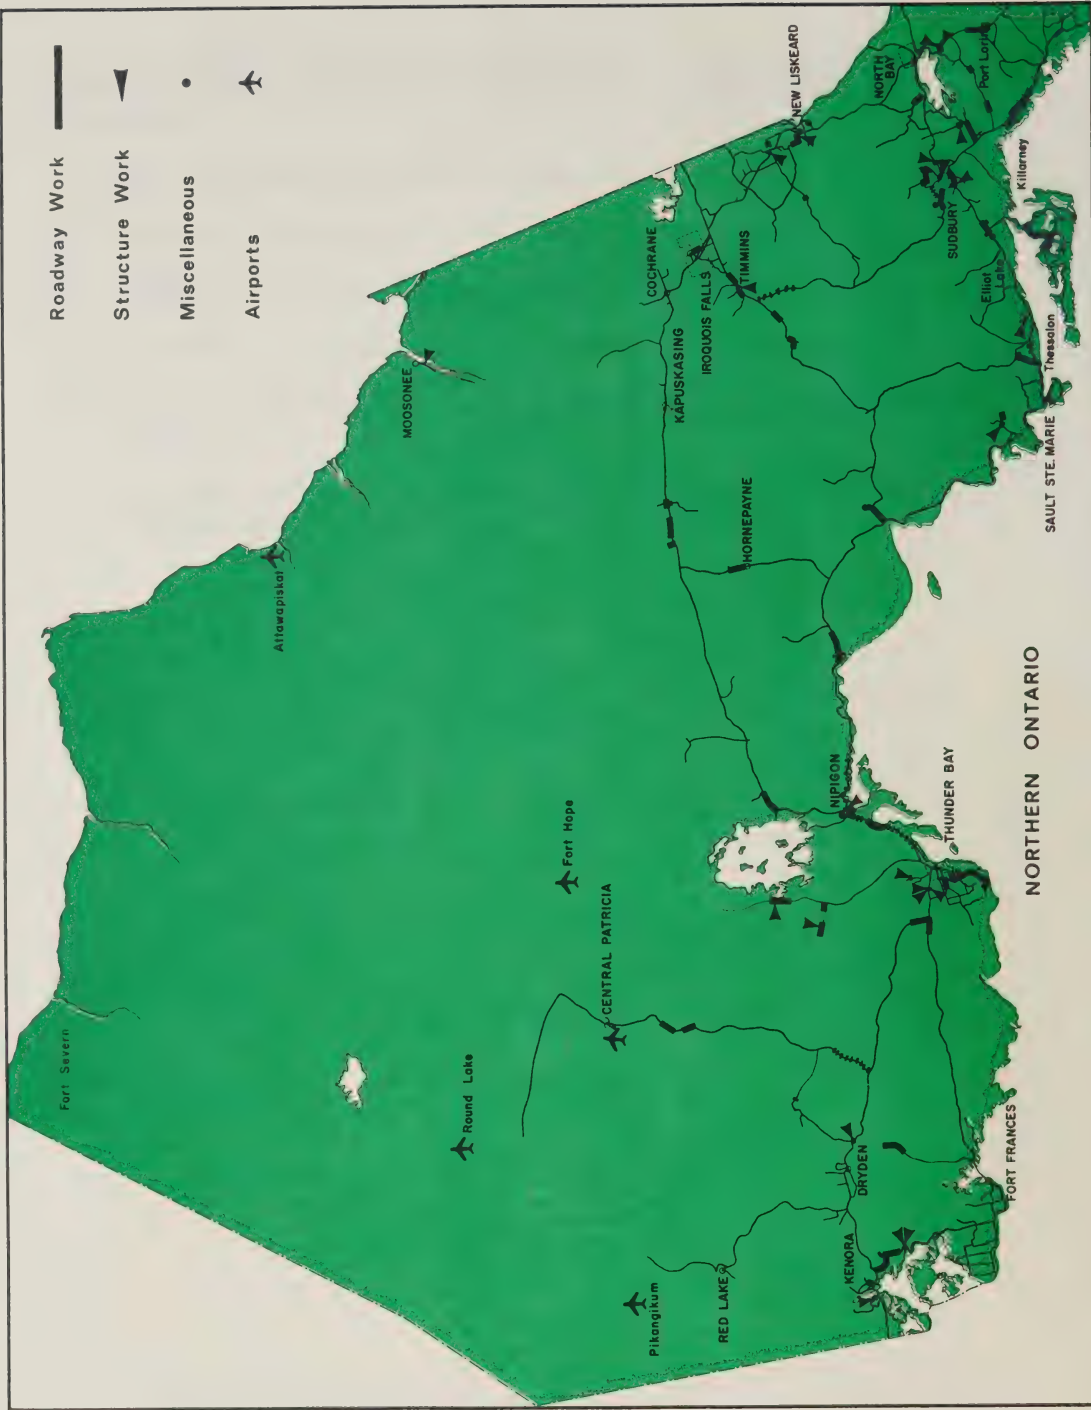

HIGHWAY-RAILWAY CROSSING PROTECTION

There were seven new grade separations completed in 1973. Three of these replaced existing deficient structures and four replaced level crossings.

The four new grade separations are:

1. Highway 27 under the C.P.R., North of Highway 26.
2. Highway 2 over the C.P.R., west of Belleville.
3. Highway 15 over the C.N.R., north of Highway 401.
4. Highway 502 over the C.N.R., west of the East Junction of Highway 2.

The total number of grade separations at railways on the King's and Secondary Highway System is now 341.
